

# DR ANNE GREER

SPECIALIST ANAESTHETIST. FANZCA. MB CHB

## ESTIMATE OF ANAESTHETIC FEES

Anaesthetists are Specialist Doctors. Their fees are set based on the Relative Value Guide (RVG) which is recommended by Medicare, the Australian Medical Association (AMA), and the Australian Society of Anaesthetists (ASA) .

Fees and rebates for anaesthesia are very dependent on time taken for a procedure, and also vary with other factors such as age, physical status, emergency status and whether the procedure occurs in normal working hours or after hours or on weekends.

Some of the amount paid will be refundable from medicare and your health fund. Rebates vary between each health fund and even between policies within each fund. There is usually a "gap payment" left after this refund. This "gap" is due to the fact that historically the amounts refunded under medicare for anaesthetic services fall well below the actual value of the service. The fee for your anaesthetist is separate from the fees charged by your surgeon and the hospital at which you are having your surgery/procedure. ***You may have a gap payment for your anaesthetic bill even when there is no gap in your surgeon's bill.***

Dr Greer's aim is to provide an estimate of fees to all patients as early as possible, and at least prior to hospital admission. **Please note that although every effort is made to provide accurate estimates, based on the above variables, the final post operation account may differ to the estimate provided.**

15min to 1hr	\$619 to \$850
2hrs	\$1100
3hrs	\$1515
4hrs	\$1925
